Projects

Worldwide Devs | [GitHub](#) | [Heroku](#)

Desc: A community of developers where users create and view profiles; author posts and comments.

Skills: MongoDB, Express, React-Redux, Node, SCSS, Axios

- Modeled mongoose schemas that display profiles, posts and comments.
- Setup routes/private routes with react router.
- Created actions and reducers.

Bamazon | [GitHub](#) | [YouTube demo](#)

Desc: Customer can purchase items; Manager can replenish inventory and add new products.

Skills: Node, MySQL, Inquirer, CLI Table

- Created MySQL database and inserted products into the table.
- Used inquirer dependency to view and manipulate MySQL database/table.
- Implemented CLI Table for aesthetical presentation of products.

Color Guess | [GitHub](#) | [Play](#)

Desc: A color guessing game, in two difficulty settings, built with HTML, CSS and JS.

Skills: HTML, CSS, JavaScript

- Authored HTML and styled elements with CSS.
- Setup the game's logic.

Experience

How Was it Detroit | Livonia, MI

August 2015 – present

Writer/Editor

- Research topics of reader interest that inspire entertaining and informative articles.
- Write and edit concert reviews and previews, album reviews and "best of" lists.

Title Source | Detroit, MI

October 2014 – August 2015

HUD Reviewer

- Utilized Quicken Loans and Title Source software to verify and update client information: vesting, taxes, HUD fees, bank payoffs, liens, judgements on Conventional, FHA and VA loans.
- Collaborated, via phone and email, with other team members, bankers, title analysts, underwriters, and closing care representatives to resolve loan-specific issues.

Education

University of Arizona | Gilbert, AZ

January 2018

Full Stack Web Development

- HTML, CSS, JavaScript, Node, Express, MySQL, MongoDB, React, Git.

University of Economic Studies (Faculty of Foreign Languages) | Bucharest, Romania
